

Modular International Inc.

Fire Extinguisher Indicator Light

The fixture is illuminated with blue LEDs and furnished with a satin finished acrylic cylindrical diffuser.

Using less than 5 watts of energy, it has an intensity greater than that of a 25-watt incandescent lamp. In addition, it has 100,000 hours of life compared to 2,500 hours of life for the 25-watt lamp.

The trim may be round or square, in either anodized aluminum, stainless steel, or painted finishes.

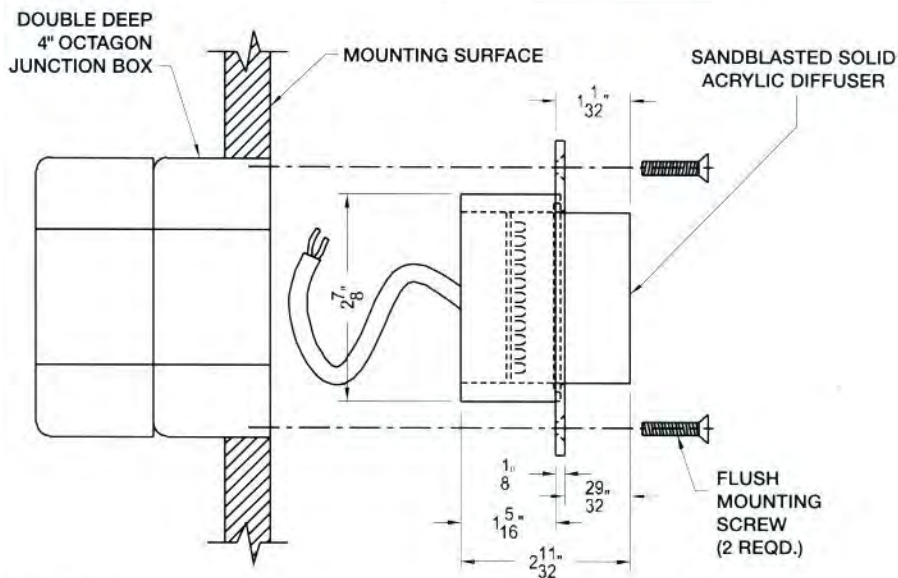

Required by some state codes.

Fire Extinguisher Indicator Light

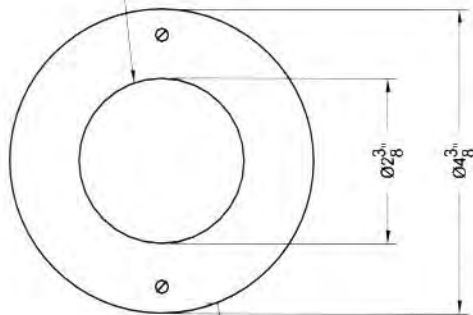

Source:	Blue LEDs	Diffuser:	Satin finish acrylic rod
Energy:	Less than 5 watts	Trim:	Anodized Aluminum, Stainless Steel, Painted Finishes, Round or Square
Life:	100,000 hours	(Allowing for 12 hours a day, for each day of the year, the total usage would be 4,368 hours. On this basis, the LEDs should last 25 years.)	

Standard model is designed for 120 volt circuit. Also available in 12 volt or 24 volt, which require the use of a step-down transformer.
